The Race
to Digital Transformation

Digital transformation is becoming a crucial factor in improving business models and therefore company's success.

You have to evolve to keep up with the market.

01

Challenges?
Yes.

Significant changes in structures and processes

Inflexible legacy technology stack that supports monolithic applications

Lack of the experience with new technologies

Navek Soft
Your Partner in Digital Transformation

Navek Soft is an Belarus based IT company. We specialize in software development, primarily in cloud services.

Our team concept — close cooperation of key narrow specialists, synergy.

We carefully choose our programmers, engineers, designers, testers. Together we are able and ready to implement the most difficult ideas.

We Know How

Our success in the market reflects our competencies and the quality of our products.

Navek Wi-Fi (Public Wi-Fi in a private cloud) and **Navek Screen** (Cloud Video Surveillance) have earned a significant market share.

Major telecom operators and banks trust us to resolve the most complex cases.

The Way We Work

Selected programs and systems for better results

Scrum

Our preferred choice for the most projects. Separate teams for each project work in two-week sprints. Every sprint ends with a release and report.

Kanban

We use Kanban for continuous projects with no strict deadline. Up to five tasks are carried out simultaneously.

Jira Software

Jira Service Desk

Benefits

Technological competitive advantage

Established Expertise

We've created more than 50 custom software applications for companies – from mid-sized businesses and enterprise-level industry leaders.

Professional Services

There are three support levels for our products. Our team is always ready to solve different problems: finding workarounds, make hot fixes, make IT security audits and improve applications.

Custom Software Development

Our professional team is ready for any challenge. We are always interested in the development of software of any complexity - from small media services to the hugest CRM-systems and on every stage.

Benefits

Our successful approach to work

Holistic Software Engineering

The holistic approach is highly valued by our customers and includes everything from business analysis and developing UX/UI to software development and future support.

Guaranteed Quality

We are serious about being the best in our industry, and our every effort is aimed at maintaining quality on all level, from the requirements to final delivery.

Success Story

Delivering Belarusian Post's global IT overhaul

Problem

The Belarusian Post had to upgrade its web portal. It was developed in the 2000s and hasn't been updated since due to a complex structure and a number of legacy solutions.

Solution

We've created a new portal, a mobile application, and a new architecture to harmonize the internal interaction of the company's disparate systems. We used our own enterprise integration bus — **Navek Fiber** — to serve as a mediator between systems and to allow an effective development of services for the end users.

All these measures made it possible for the new portal to become the largest post office electronic platform in Belarus

Success Story

Cloud CCTV system for Beltelecom —
the leading telecom company in Belarus

Problem

Creating a customer CCTV service of a new concept.

Solution

We've created a complete cloud CCTV system based on our own **Navek Screen**. It takes into account all the factors of cloud video surveillance organization. Now Beltelecom is able to use its wast infrastructure to provide virtulally every customer with a HD CCTV video on the go, especially considering Screen's excellent scalability and low maintenance cost.

New service has led to an explosive growth of a current customers base.
